

Ubuntu 18.XX Installation

It is assume that you have bootable disk of Ubuntu 18.04

Step 1) Run the Ubuntu DVD

Once the system is booted using the bootable disk, you can see the following screen with options including **"Try Ubuntu**" and **"Install Ubuntu**" as shown in the image below.

- "Try Ubuntu" with this option you can have a sneak peek into the ubuntu without installing it in your system
- "Install Ubuntu" to install Ubuntu in your system. So click "**Install Ubuntu**" to continue with the installation process.

Step 2) Choose your Keyboard layout

Choose your favorite keyboard layout and click "Continue". By default English (US) keyboard is selected and if you want to change, you can change here and click "Continue",

Step 5) Select the appropriate Installation Type

Next the installer presents you with the following installation options including:

- Install Ubuntu alongside with Windows7
- Erase Disk and Install Ubuntu
- Encrypt the new Ubuntu installation for security
- Use LVM with the new Ubuntu installation
- Something Else

Where,

Erase Disk and Install Ubuntu – This option have only Ubuntu and erasing everything preinstalled on your system. This ensures a fresh copy of Ubuntu 18.04 LTS is installed in your system.

Encrypt the new Ubuntu installation for security – Choose this option if you are looking for extended security for your disks as your disks will be completely encrypted. If you are beginner, then it is better not to worry about this option.

Use LVM with the new Ubuntu installation – Choose this option if you want to use LVM based file systems.

Something Else – Choose this option if you are advanced user and you want to manually create your own partitions and want to install Ubuntu along with existing OS (May be Windows or other Linux Flavor)

Step 8) Provide your User Credentials

Provide your user credentials. In this screen provide your name, computer name, username and the password to login into Ubuntu 18.04 LTS

Click "Continue" to begin the installation process.
